

User Testing Report

eMagiz Ticketing System — Team 04

1. Purpose and Scope

This report documents **user testing** (also called **acceptance** or **manual end-to-end testing**) of the eMagiz Ticketing System. User tests validate the system from the perspective of real users interacting with the **web UI**, not the raw API.

Goals:

- Verify that each role (Customer, Support, Consultant) can complete their daily tasks.
- Confirm that navigation, forms, filters, and feedback messages match user expectations.
- Validate the full ticket lifecycle across multiple roles in one realistic scenario.

2. Testing Approach

Aspect	Choice
Method	Manual exploratory + scripted scenarios
Type	Black-box (testers use UI only, no code inspection)
Participants	Team 04 members acting as Customer, Support, Consultant

Each scenario lists: **preconditions**, **steps**, **expected result**, and **actual result** (Pass/Fail).

3. Test Environment Setup

Test accounts

Role	Username	Password	Landing page after login
Customer	demous	demopass	/customer
Support	demosup	demopass	/support
Consultant	democons	demopass	/consultant

4. User Test Scenarios — Customer Portal

UT-C1: Login and dashboard

Precondition	Application running, user logged out
Steps	1. Go to /login 2. Enter demous / demopass 3. Click Sign in
Expected	Redirect to Customer Dashboard; sidebar shows Customer Portal; stat cards visible (Open Tickets, Waiting for Support, etc.)
Result	Pass

UT-C2: Submit new ticket

Precondition	Logged in as Customer
Steps	1. Sidebar → Submit Ticket (or dashboard CTA) 2. Fill title: User test – dashboard sync issue 3. Type: Incident , Priority: High 4. Description: steps to reproduce 5. Submit
Expected	Success message; ticket appears on Dashboard and My Tickets with status Open
Result	Pass

UT-C3: My Tickets — filter and open detail

Precondition	At least one ticket exists for customer
Steps	1. Sidebar → My Tickets 2. Use search / status filter 3. Click a ticket row
Expected	Ticket detail opens; shows type, priority, status, timeline; conversation panel visible
Result	Pass

UT-C4: Add public comment

Precondition	Ticket open (not Closed/Denied)
Steps	1. On ticket detail → Conversation 2. Type comment → Post

Expected	Comment appears with username and timestamp; no team notes section for customer
Result	Pass

UT-C5: Change priority (OPEN only)

Precondition	Ticket status = Open
Steps	1. Ticket detail → Priority button 2. Select Critical → Confirm
Expected	Priority badge updates; action logged in timeline
Result	Pass

UT-C6: Cannot change priority after review

Precondition	Ticket moved to In Review by support
Steps	1. Open ticket as customer 2. Look for Priority button
Expected	Priority change not available to customer
Result	Pass

UT-C7: Activity notifications

Precondition	Support performed action on customer's ticket
Steps	1. Click bell icon in top bar 2. Review recent items
Expected	Notifications show ticket-related events; click navigates to ticket
Result	Pass

5. User Test Scenarios — Support Portal

UT-S1: Dashboard and queue overview

Precondition	Logged in as demosup

Steps	1. Open Support Dashboard 2. Check stat cards and charts 3. Sidebar → Ticket Queue
Expected	Queue lists all organisation tickets; filters and search work
Result	Pass

UT-S2: Triage — Add to Review

Precondition	Customer ticket in Open
Steps	1. Triage Board or Queue → open ticket 2. Click Add to Review
Expected	Status → In Review ; card moves column on Triage Board
Result	Pass

UT-S3: Accept and assign ticket

Precondition	Ticket In Review or Accepted
Steps	1. Accept ticket 2. Assign → select consultant democons 3. Confirm
Expected	Status → Assigned ; assignee shown on ticket
Result	Pass

UT-S4: Deny ticket

Precondition	Separate test ticket in Open/In Review
Steps	1. Open ticket → Deny 2. Confirm
Expected	Status → Denied ; ticket no longer in active triage
Result	Pass

UT-S5: Create ticket on behalf of customer

Steps	1. Ticket Queue → Create Ticket 2. Mode: Customer ticket 3. Select customer, type RFC,

	fill fields → Submit
Expected	Ticket created with selected customer as creator
Result	Pass

UT-S6: Create internal ticket

Steps	1. Create Ticket → mode Internal 2. Submit
Expected	Internal ticket created; on Queue only View and Assign (no Accept/Deny)
Result	Pass

UT-S7: Team notes

Steps	1. Open any ticket → Team Notes panel2. Add internal note
Expected	Note visible to support; not visible when logged in as customer on same ticket
Result	Pass

UT-S8: User management

Steps	1. Sidebar → Users 2. Create test user3. Verify in list
Expected	User appears with correct role; validation on required fields
Result	Pass

UT-S9: Global audit log

Steps	1. Sidebar → Audit Log 2. Filter by action type3. Click ticket-linked entry
Expected	Log entries match recent actions; click opens ticket overview
Result	Pass

6. User Test Scenarios — Consultant Portal

UT-K1: Dashboard — assigned count

Precondition	At least one ticket assigned to democons
Steps	1. Login as consultant 2. View dashboard stat cards
Expected	Assigned to Me reflects correct count
Result	Pass

UT-K2: Assigned to Me list

Steps	1. Sidebar → Assigned to Me 2. Filter by status/priority
Expected	Only tickets assigned to this consultant; assignee names resolve
Result	Pass

UT-K3: Work on ticket — conversation + team notes

Steps	1. Open assigned ticket 2. Reply in Conversation 3. Add Team Note
Expected	Both panels work; public reply visible to customer
Result	Pass

UT-K4: Close ticket

Precondition	Ticket assigned to current consultant
Steps	1. Ticket detail → Close 2. Confirm
Expected	Status → Closed ; comment form disabled
Result	Pass

UT-K5: Cannot access support-only pages

Steps	1. As consultant, navigate to /support/users
Expected	Unauthorized or redirect — no access to user management
Result	Pass

7. End-to-End Cross-Role Scenario (Primary User Test)

Step	Actor	Action	Expected state
1	Customer	Submit Incident ticket (High priority)	OPEN
2	Customer	Add comment: "Issue started this morning"	Comment visible
3	Support	Triage Board → Add to Review	IN_REVIEW
4	Customer	Check dashboard / notifications	Sees support activity
5	Support	Accept ticket	ACCEPTED
6	Support	Assign to democons	ASSIGNED
7	Consultant	Open Assigned to Me → select ticket	Detail loads
8	Consultant	Add team note (internal)	Note not visible to customer
9	Consultant	Reply in conversation (public)	Customer sees reply
10	Consultant	Close ticket	CLOSED
11	Customer	Open ticket → verify Closed	No new comments allowed
12	Support	Audit Log → verify entries	TICKET_CREATED, STATUS_*, COMMENT, ASSIGNED

Result: Pass (full workflow completed without errors)

8. Test Results Summary

Area	Scenarios	Passed	Failed
Customer portal	7	7	0
Support portal	9	9	0
Consultant portal	5	5	0
Cross-role E2E (UT-10)	1	1	0
Total	22	22	0

9. How to Reproduce User Tests

1. **Accounts:** use credentials from Section 3.2
 2. **Run UT-C1 ... UT-C10** as Customer (one browser profile)
 3. **Run UT-S1 ... UT-S10** as Support (second profile or incognito)
 4. **Run UT-K1 ... UT-K5** as Consultant (third profile)
 5. **Run UT-10** with all three roles in parallel — this is the main acceptance test
 6. Record Pass/Fail per scenario; compare with Expected columns above
-

10. Conclusion

User testing confirmed that the eMagiz Ticketing System supports realistic workflows for all three roles. The primary end-to-end scenario (customer submission through support triage to consultant resolution) completes successfully.
